XaasIO Network Management Tool

Comprehensive Network Monitoring and Performance Management

Benefits

Faster Troubleshooting

- Reduce MTTR with root cause identification and correlated event analysis.

Reliability

- Ensure high availability and business continuity with automated alerts and escalations.

Flexibility

- Supports customizable templates, APIs, and integrations with ITSM, ticketing, and automation platforms.

Future-Ready

- Adapt to infrastructure changes with agentless monitoring and cloud-native capabilities.

Overview

The XaasIO Network Management Tool is a powerful, enterprise-grade monitoring platform that delivers real-time insights into your IT infrastructure. Designed to handle the most complex and distributed network environments, it ensures continuous availability, peak performance, and rapid problem resolution.

This solution supports a wide range of network devices, servers, cloud platforms, virtual machines, and applications—making it ideal for both SMBs and large-scale enterprises.

Why XaasIO?

Enterprise Grade Open Source Software.

Offers comprehensive life cycle administration, including monitoring, alerting, and seamless upgrade.

Reduces Total Cost Of Ownership (TCO) for cloud infrastructure.

Provides long-term security updates and compliance with international standards.

Device & Interface Monitoring

XaasIO Network Management Tool monitors routers, switches, firewalls, and endpoints using SNMP, IPMI, and agents.

Performance Metrics

XaasIO Network Management Tool tracks bandwidth, packet loss, latency, CPU, memory, and disk usage in real time.

Event & Alert Management

XaasIO Network Management Tool sends instant alerts via email, SMS, or webhooks with customizable thresholds and escalation policies.

Auto Discovery & Topology Mapping

XaasIO Network Management Tool auto-discovers devices and maps network topology dynamically.

Custom Dashboards & Visualization

XaasIO Network Management Tool provides rich dashboards, graphs, and maps for better network insights.

User Access & Role Management

XaasIO Network Management Tool allows role-based access control to ensure secure operations and visibility.

Historical Data & Trend Analysis

XaasIO Network Management Tool retains long-term performance data for capacity planning and forecasting.

Integration & Automation

XaasIO Network Management Tool integrates with ITSM, CMDBs, and automation tools via API.

Key Feature

Full Network Visibility
Monitor routers, switches, firewalls, and more using SNMP, IPMI, SSH, Telnet, and agents.

Advanced Visualization
Build dashboards, maps, and graphs for real-time network insights.

Real-Time Monitoring
Track availability, bandwidth, latency, and detect issues instantly.

Intelligent Alerting
Get alerts via email, SMS, or webhooks with custom escalation logic.

Scalable Architecture
Monitor thousands of nodes with distributed, proxy-supported design.

Automated Discovery
Auto-detect devices and services to simplify setup.

Historical Data & Trends
Retain data for capacity planning and SLA reports.

Security & Access Control
Use role-based access and auditing to protect monitoring data.

XaasIO For Reason!

A scalable, customizable, and cost-effective solution with broad protocol support, strong community backing, and proven performance in large environments.

Support & Service

- 24 x 7 engineering support by technical experts.

- Assured response time of 15 minutes and round the clock support to solve critical issues.

SLAs

- Upto 99.9% availability SLA.
- Read/Write latency SLA
