

XaasIO IAM Module

> Comprehensive Identity & Access Management for Modern Applications

Benefits

Simplified User Management

Centralized management simplifies admin tasks.

Enhanced Security

MFA, SSO, and support for OAuth 2.0/OpenID Connect ensure secure access.

Seamless Integration

Easily integrates with LDAP, Active Directory, and external identity providers.

Improved User Experience

SSO streamlines login, enhancing user convenience across applications.

Customization & Flexibility

Customizable interfaces for consistent branding and user interaction.

Overview

The XaasIO IAM Module provides enterprise-grade identity and access management, ensuring seamless authentication, authorization, and identity provisioning across platforms. With features like Single Sign-On (SSO), Multi-Factor Authentication (MFA), and user federation, it simplifies access management while boosting security and compliance.

Why XaasIO?

Enterprise Grade Open Source Software.

Ensures comprehensive and secured Data Backup.

Reduces Total Cost Of Ownership (TCO) for cloud infrastructure.

Provides long-term security updates and compliance with international standards.

Core Capabilities of the XaaSIO IAM Module

Single Sign-On (SSO)

Users log in once to access multiple applications without re-authenticating.

Admin Console

Provides a web-based interface for managing users, roles, and configurations.

Session Management

Monitors and controls user sessions with options for revocation and timeout settings.

Multi-Factor Authentication (MFA)

Enhances security with multi-factor identity verification.

Audit and Event Logging

Detailed logging of authentication events for monitoring and compliance.

User Federation

Integrates with existing databases (LDAP, Active Directory) for centralized user management.

Role-Based Access Control (RBAC)

Simplifies access management by assigning role-based permissions.

REST API

Offers powerful integration capabilities with external applications and services.

High Availability and Clustering

Supports clustered deployment for reliability and scalability.

Key Features

Single Sign-On (SSO)

One login for all authorized applications.

Multi-Factor Authentication (MFA)

Enhances security with multiple authentication methods.

User Federation

Integrates with LDAP and Active Directory for identity management.

Fine-Grained Access Control

Uses RBAC and ABAC to manage access permissions.

Customizable User Interfaces

Custom login pages and themes for branding.

Support for Open Standards

Works with OAuth 2.0, OpenID Connect, and SAML 2.0.

Use Case

Enterprises: Centralized identity management for global teams.

Service Providers: Secure identity management for cloud services.

Developers: Offloads IAM complexity to a scalable platform.

Support & Service

- 24 x 7 engineering support by technical experts.
- Assured response time of 15 minutes and round the clock support to solve critical issues.

SLAs

- Upto 99.9% availability SLA.
- Read/Write latency SLA

XaasIO for Reason!

Scalable, secure, and flexible identity management with centralized control, reduced overhead, and compliance support.
