

# XaaSIO SIEM

## > Security Monitoring and Management

### Benefits

#### Unified Security Platform

- **Simplified Management:**

Combines multiple security functions into a single platform, making it easier to manage and monitor security across all environments.

#### Enhanced Threat Detection and Response

- **Real-Time Protection:**

Continuously monitors for threats and automatically responds to incidents, reducing the risk of breaches.

#### Compliance Made Easy

- **Regulatory Support:** Helps meet industry regulations like PCI DSS, GDPR, and HIPAA with built-in compliance reporting and monitoring tools.

#### Scalable and Flexible

- **Adaptable to Your Needs:** Scales to protect any size organization and can be customized to meet specific security policies and requirements.

XaaSIO SIEM provides comprehensive security monitoring and protection for endpoints and BSS/OSS cloud workloads. Powered by Wazuh SIEM, it integrates historically separate functions into a unified platform and agent architecture. XaaSIO SIEM delivers robust security for OpenStack and BSS/OSS workloads.

**Our solution helps organizations strengthen their security posture, ensure compliance, and protect critical assets against evolving cyber threats.**

### Why XaaSIO?

Enterprise Grade Open Source Software.

Instant alerts and responses to emerging threats.

Around the clock service support ecosystem.

Drives down infrastructure costs to expedite your applications.

## Key Features

- **API-Level Monitoring:** Monitors telco cloud infrastructure from major providers like AWS, Azure, and Google Cloud.
- **Configuration Assessment:** Evaluates and secures cloud environment settings.
- **Change Detection:** Identifies unauthorized changes in files.
- **User and Application Tracking:** Monitors file modifications and identifies users.
- **Active Responses:** Quickly counters active threats.
- **Remote Commands:** Conducts live forensics and system queries remotely.
- **Agent-Based Scanning:** Detects malware and suspicious activities.
- **Server Component Analysis:** Analyzes log data for indicators of compromise

## Support & Service

- 24 x 7 engineering support by technical experts.
- Assured response time of 15 minutes and round the clock support to solve critical issues.

## XaasIO for a Reason!

**XaasIO SIEM** ensures a robust, scalable, and user-friendly security solution that enhances threat detection, simplifies compliance, and improves operational efficiency of your cloud environment

## Secured & Efficient Cloud

## Architecture

- **Agents:** Installed on endpoints for threat prevention, detection, and response across multiple OS.
- **Server:** Analyzes data using rules and threat intelligence, manages agent configurations.
- **Indexer:** Scalable engine for storing and searching alerts.
- **Dashboard:** Web interface for visualizing data, managing settings, and monitoring system status.

## SLAs

- Upto 99.9% availability SLA
- Read/Write latency SLA
