

The XaasIO logo is positioned in the top right corner of the header. It features the word 'XAASIO' in a bold, white, sans-serif font. The background of the entire header is a dark blue grid with glowing blue lines and a central shield icon, suggesting a secure and digital environment.

XaasIO Service Provider Cloud

Align XaasIO Service Provider Cloud To Meet Your Your Organizational Needs

Ensure Efficient Cloud Service with XaasIO Service Provider Cloud

XaasIO's Service Provider Cloud offers a turnkey solution tailored for telecom operators, managed service providers, and cloud service providers.

We deliver efficient cloud services with transparent billing and automated hosting management, ensuring seamless, scalable, and cost-effective service delivery.

Why XaasIO?

Enterprise Grade Open Source Software.

Solves your cloud infrastructure challenges with Private Cloud or Public Cloud on Open Infrastructure of your choice.

Around the clock service support ecosystem.

Drives down infrastructure costs to expedite your applications.

KEY BENEFITS

Automated tasks to streamline operations and reduce costs.

Easily scalable infrastructure to accommodate business growth without sacrificing performance.

Enhanced user experience with self-service options and transparent billing.

Ability to launch new services quickly to seize revenue opportunities.

XaasIO Solutions

XaasIO Service Provider Cloud is designed to deliver a hyperscaler experience by leveraging the powerful combination of OpenStack for cloud infrastructure management, Kubernetes for container orchestration, and Ceph for scalable storage.

OpenStack serves as the foundation for creating and managing a flexible cloud infrastructure. Its modular architecture allows for the deployment of various services, including compute, storage, and networking, tailored to the needs of any workload.

Enhances the solution by providing container orchestration. It automates the deployment, scaling, and management of containerized applications, making it easier to run cloud-native applications at scale. Kubernetes' self-healing, load balancing, and auto-scaling features ensure high availability and efficient resource utilization.

Offers highly scalable and resilient storage solutions, ensuring that data is securely stored and accessible. Its ability to provide block, file, and object storage from a single cluster simplifies the storage architecture and facilitates efficient data management and access.

XaasIO BSS Module

XaasIO BSS, the cloud billing and hosting automation software, is the linchpin that ties together the capabilities of OpenStack, Kubernetes, and Ceph with a seamless, automated billing and management experience.

- **Automated Provisioning:** Instant provisioning of cloud resources as per customer requests, enhancing operational efficiency.
- **Flexible Billing Models:** Supports a variety of billing models, including usage-based, subscription, and tiered pricing, ensuring transparency and fairness in billing practices.
- **Self-service Portals:** Offers end-users control over their resources, improving customer satisfaction through empowerment and flexibility.
- **Real-time Usage and Billing Metrics:** Ensures accurate billing and provides insights into usage patterns, helping customers optimize their resource utilization.

Key Features

- Culture, Awareness and Training
- Risk and Compliance
- Identity Access and Management
- Asset and Vulnerability Management
- Disaster Recovery and Business Continuity
- Server and Endpoint Security
- Network Security
- Cloud Security
- Application and Database Security
- Cybersecurity incident Response
- Threat Intelligence

Support

- 24 x 7 engineering support by technical experts.
- Assured response time of 15 minutes and round the clock support to solve critical issues.

SLAs

- Upto 99.9% availability SLA
- Read/Write latency SLA

XaasIO for a Reason!

XaasIO integrates OpenStack for cloud infrastructure management, Kubernetes for container orchestration, and Ceph for scalable storage. This combination provides a hyperscaler experience, enabling providers to deliver flexible, efficient, and robust cloud services.
