

# XaaSIO Sovereign Cloud

## > Ensuring Data Privacy With Absolute Control

### Key Features

#### Data Sovereignty

- Ensures data is stored and processed within specific geographic and legal boundaries.

#### Compliance and Regulation

- Meets strict regulatory and compliance requirements, including GDPR, HIPAA, and other local data protection laws.

#### Privacy and Security

- Enhanced security with encryption, dedicated physical infrastructure, and strict access controls.

#### Localized Data Centers

- Operates within the jurisdiction, ensuring data does not leave the region.

#### Customization and Control

- Offers extensive customization and control over the cloud environment.

XaaSIO Sovereign Cloud is a cutting-edge cloud platform designed to meet the rigorous demands of data sovereignty and compliance. Tailored for organizations that require stringent data residency and protection measures, it ensures that your data is stored, processed, and managed within specified jurisdictions, adhering to local regulations and standards.

### Why XaaSIO?

Enterprise Grade Open Source Software.

Solves your cloud infrastructure challenges with Private Cloud or Public Cloud on Open Infrastructure of your choice.

Around the clock service support ecosystem.

Drives down infrastructure costs to expedite your applications.

## XaasIO Solutions for Sovereign Cloud

### OpenStack for IaaS

Provides local control and customizable security for private cloud infrastructure.

### Kubernetes for PaaS

Automates deployment and management of containerized applications with policy-driven governance.

### Hadoop for Big Data

Ensures local data processing and scalable storage and analysis within jurisdictional boundaries.

## Support & Ecosystem

- **Continuous Improvements:** Robust ecosystems of OpenStack, Kubernetes, and Hadoop ensure ongoing improvements and security updates.
- **Expert Support:** Xaasio offers expert support for best practices, challenges, and achieving sovereign cloud objectives.

## Security & Governance

- **Multi-layered Security:** Enforces strict access controls, data encryption, and secure processing practices across all cloud layers.

### SLAs

- Upto 99.9% availability SLA.
- Read/Write latency SLA

## XaasIO for a Reason!

**XaasIO Sovereign Cloud** ensures that data storage, processing, and management comply with specific legal, regulatory, and policy requirements of a particular jurisdiction. This is crucial for sectors like government, healthcare, and finance.
