Xaasio Virtual Proxy server

Ensure Efficient Network Security & Performance

Xaasio Virtual Proxy is a next-generation network security solution designed to operate as a virtual proxy, providing advanced traffic inspection and management capabilities. While it focuses on deep packet inspection (DPI), intrusion prevention, and application control, Xaasio Virtual Proxy can be integrated into broader network environments like those provided by Xaasio's NFV (Network Functions Virtualization) Module.

Why Xaasio?

Enterprise Grade Open Source Software.

Instant alerts and responses to emerging threats.

Around the clock service support ecosystem.

Drives down infrastructure costs to expedite your applications.

KEY BENEFITS

Enhanced Security: Xaasio Virtual Proxy offers advanced threat detection and prevention to safeguard your network from cyber threats.

Improved Network Visibility: Xaasio Virtual Proxy delivers clear insights through deep packet inspection and analytics.

Increased Control: Manage applications, websites, and traffic with granular precision.

Increased Control: Manage applications, websites, and traffic with granular precision.

User-Friendly: Xaasio Virtual Proxy simplifies security policy management with an intuitive interface.

Key Features

- **Deep Packet Inspection:** Xaasio Virtual Proxy offers advanced DPI to inspect, analyze, and control traffic at a granular level.
- **Application Control:** Identifies and manages thousands of applications, allowing control over network access.
- **Web Filtering:** Xaasio Virtual Proxy blocks specific websites or categories based on policies.
- **TLS/SSL Inspection:** Detects threats in encrypted traffic by inspecting TLS/SSL streams.
- **Reporting and Analytics:** Delivers detailed insights into network usage, security events, and application behavior.
- **Scalability:** Xaasio Virtual Proxy easily scales for both small and large networks.
- **Low Resource Usage:** Xaasio Virtual Proxy is efficient with minimal resource consumption.

Technical Specifications

- **Supported Platforms:** Windows, Linux, macOS, and various cloud platforms.
- **Network Interfaces:** Supports multiple network interfaces for flexible deployment.
- **Performance:** High throughput and low latency for optimal network performance.
- **Security Protocols:** Supports a wide range of security protocols, including SSL/TLS, IPsec, and more.
- **Management:** Web-based management interface with detailed reporting and analytics.

Support

- 24 x 7 engineering support by technical experts.
- Assured response time of 15 minutes and round the clock support to solve critical issues.

SLAs

- Upto 99.9% availability SLA
- Read/Write latency SLA

Xaasio for a Reason!

Xaasio offers a cost effective Virtual Proxy by combining multiple security functions into a single solution for multiple, separate security products.
